

Motors and drives

DC Brushless torque motor

Key features

- Low maintenance
- Reduced friction torque and cogging
- Customised designs

Applications

- Conventional radar antennae
- Electro-optical systems
- Remote control weapon systems (RCWS)
- Targeting gimbals rotation

Extensive range of electric motors, from a few Watts to more than 200 kW. These motors are intended to fit on-board aerospace, defence, and other demanding environments. They are available as a line replaceable unit (housed) or frameless that can be integrated by the customer. These low friction motors power high torque drives while preventing the need for a reduction gear.
